Ensure consistent high-quality welds while reducing downtime for maintenance and repairs

Fixed automatic MIG guns that you fabricate yourself can cause downtime and rework. Get Tregaskiss® Fixed Automatic MIG Guns for the dependable performance, productivity and weld quality you need.

Tregaskiss MW1 Fixed Automatic Water-Cooled MIG Guns are engineered for hard tooling automation applications requiring a simple, durable and repeatable MIG gun that maximizes uptime and throughput. These MIG welding guns are available in 500 and 600 amp models.

AccuLock™

Now Available!

AccuLock™ R Consumables are designed for increased tip life and replacement accuracy, which can reduce your replacement frequency and related downtime.

Few replacement parts results in low inventory costs

Simple design makes maintenance easy and quick

Choose from cable lengths ranging from 3' to 15'

AccuLock™ R (Robotic) Consumables

Eliminate contact tip cross-threading issues with new AccuLock R Consumables. These new consumables are designed for increased tip life, which can reduce replacement frequency and related downtime.

AccuLock HDP Contact Tips can increase life by an additional 10x or more in pulse welding applications. And in most cases, your current tip and diffuser can be replaced with no impact to Tool Center Point (TCP), making this upgrade low effort, low risk, and high payoff.

QUICK LOAD® Liners

The QUICK LOAD Liner System loads from the front of the MIG gun, and requires less than half the time and effort for replacement when compared with conventional liners. These liners interface with a QUICK LOAD Liner Retainer that is seated within the power pin of the gun on first use. QUICK LOAD Liners are compatible with 600 amp MW1 Tregaskiss Fixed Automatic MIG guns. Available for wire sizes between 0.023" and 3/32" and in lengths of up to 15 feet for robotic applications.

Accessories

TOUGH GARD Anti-Spatter Liquid

This ready-to-use water-soluble, non-toxic product creates a sacrificial surface that reduces spatter adhesion. This prolongs the life of your consumables and minimizes downtime due to nozzle cleaning which can help reduce your operating and maintenance costs.
